

## Gagan - Colours

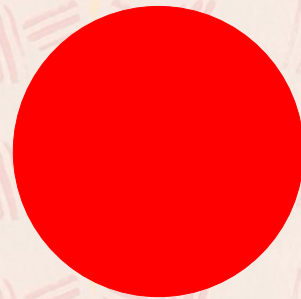

Cut around the lines to play some language games. Try to use Gamilaraay/Yuwaalaraay if you can - you might also compare English with language for some games.

1. **Say it:** Children show you the correct word or circle when you say the word.
2. **Match it:** Mix them up, and children can match words with circles with the same colour.
3. **Sounds:** Get children to put them in piles of words starting with the same sound. (Older children can look at the letters). Which words start with 'g'? Which words start with 'b'? Are there any others?
4. **Memory:** Face down, children take it in turns to turn them over and back again, until they get matching pairs.
5. **Find it:** Say the colour word, and children show you something on their clothes or in the room that is the colour.
